## Vines

Please note: Clematis & Climbing Roses have their own list.

subject to availability

### **Actinidia** *Hardy Kiwi*

**Red Beauty** *pollinate with Artic Beauty* Edible, ornamental. Small white fragrant flowers, green sweet fruit, late summer to mid fall. Reddish cast foliage becomes showier as autumn approaches. Z3b

**Arctic Beauty** *male pollinator* Prized as ornamental for its striking pink, white and green variegated leaves, very hardy. Z3b

**Hardy Red** *pollinate with Hardy Male* for larger & more fruits. Unusual, attractive cranberry-red & very flavorful fruits ripen early Sept. - Oct., vigorous ornamental, easy-to-grow vine. Z4

**Hardy Male** *male pollinator* One male can pollinate up to 8 females including *Actinidia chinensis* & *Actinidia kolomikta*. Vigorous growing. Large, creamy white flowers with extended blooming period. Z4

**Aristolochia durior or macrophylla** *Dutchman's Pipe* 15-20' Vigorous, twining vine. Grows flat against a trellis. Large heart shaped leaves. Insignificant yellow, smoking pipe shaped flowers hide under foliage. Likes sun to shade. Offers dense shade. Z5

### **Campsis radicans** *Trumpet Vine*

**Atomic Red** 20-30' Dark red buds open to orange-red, 3-4" trumpet-like flowers which deepen in color as they mature, to an incredibly bold red. Vigorous vine climbs on stone or woodwork. Attracts pollinators. Z4.

**Hydrangea anomala petiolaris** *Climbing Hydrangea* 25-40'+ The Queen of the Vines. Likes part shade to shade; growth starts out slowly, but takes off year 3 or 4; white lacecap flowers; dark glossy foliage; nice cinnamon brown exfoliating bark; can be used as a gorgeous groundcover. Z4.

### **Lonicera** *Honeysuckle*

**Alabama Crimson** 10-20' Long trumpeted red bloom, the best-growing red available, non-fragrant but the plant quality makes up for the lack of fragrance. Attracts pollinators. Full sun. Shade tolerant. Z4

**Dropmore Scarlet** 10-20' Bright orange-scarlet tubular flowers from June to September. Attracts pollinators. Red berries in fall. Full sun. Shade tolerant. Z4.

**Goldflame** 10-20' Rosy-red and yellow fragrant flowers from June until frost. Oval blue-green foliage and purplish-red stems. Attracts pollinators. Full sun. Shade tolerant. Z4.

**Honeybelle** 10-20' Deep gold flowers is like a waterfall the repeat bloom is extraordinarily consistent. Exceptionally hardy. Compact twining vine will bloom well into fall and produces some red berries. Full sun. Shade tolerant. Z3

**Mandarin** 15-20' Mandarin orange flowers with pale orange interiors on a vigorous twining vine will quickly cloak shade arbors, old trees,

and woven wire fences. Drape over walls or let it sprawl across the rooftop for cottage garden charm. Full sun. Z4

### **Parthenocissus tricuspidata** *Boston Ivy*

30-50' Dense, self-clinging vine. Attractive thick, glossy green foliage with exceptional fall color of orange to red. Blue-black berries favored by birds. Insignificant flowers. Excellent for covering masonry. Z4.

### **Schizophragma hydrangeoides** *Hydrangea Vine*

**Moonlight / Roseum** 20-30' Deciduous, woody-stemmed, climbing vine. Pewter, blue-green cast over heart shaped leaves, lace cap hydrangea-like creamy white flowers in summer. Foliage turns yellow in fall. Attaches to and grows up flat vertical surfaces by stem borne adhesive rootlets. Reddish-brown stems provide some interest in winter. Z5.

### **Wisteria**

**Summer Cascade** 'Betty Matthews' 5-25', Clusters of sweetly fragrant, deep, lavender-blue 8-12" June flowers, twining vine that can reach height if it is supported and growing in a moist, sunny to partially shaded site. Most floriferous in full sun. Perfect for training over an arbor or pergola. Late season seedpods add multi-season interest, Z4.

**Amethyst Falls** Twining plant grows one third the rate of Asian wisteria for better behavior in small spaces. Slightly fragrant purple racemes bloom at an early age. Great in containers for porch or patio. Z5.

### **Humulus** *Hops*

**Summer Shandy** Hops are used for brewing beer, but this variety was bred for its ornamental appeal. The bright golden-yellow foliage of this bine (not vine) is colorful all season, refined habit, less aggressive growth than other varieties. Well-suited to home gardens.

**Nugget** Yields pale greenish-yellow female cones, used as a bittering agent in brewing and also enjoyed for herbal aroma qualities. Mulch in winter for protection. Ripens starting in August.

**Blanca** 20'+ Vigorous, decorative climber with foliage resembling that of grapes. Lemon-yellow new growth matures to a darker lime green, contrasting nicely with red-brown stems. The bell-shaped hops are very attractive. Prefers partial shade.

### **Polygonum auberti** *Silver Lace Vine*

15-25' Vigorous in sun or shade - covers arbors, fences rapidly. Emerging leaves tinged red, mature to a bright green. Masses of small, fragrant creamy white flowers in profuse, narrow panicles cover the vine over a long bloom period of mid summer to fall. From a distance, this vine is similar in appearance to autumn sweet clematis. Z4
