

# Rolling Green Nursery

## Peonies

subject to availability

**E**very season, we strive to have some new and unusual Paeonia (Peonies) in stock, as well as a selection of the tried and true classics. Plant in full sun, and be careful not to bury them too deeply. So far, we have found these peonies to be nicely deer-resistant as well.

**TREE PEONY** deciduous shrub, 5-7" flowers, blooms early spring before herbaceous peonies, on last year's stems.

**SINGLE** single row of flowers with a center of stamens, graceful and less inclined to lie down.

**JAPANESE** have a double row of petals with a center of enlarged stamens.

**DOUBLE and SEMI-DOUBLE** rounded flowers in which all or most of the stamens have turned into petals. These old fashioned classics are loved for their hardiness and large flowers.

**ITOH** or Intersectional peony crosses of tree peony and herbaceous peony.
